

Introduction

To Our Valued Customers:

Expand the scope of your business by offering the broad line of Carlisle® performance products. Grow your business with specialty tires and wheels for outdoor power equipment, golf carts, ATVs, UTVs, trailers, towables, agriculture, construction, and industrial applications.

For almost 100 years, Carlisle has offered specialty tire products with a continued commitment to new product development. Recently, Carlisle launched the new Sport Trail® LH trailer tires with an optimized tread pattern for larger bias trailer tires. For turf maintenance, the new Carlisle Turf Smart® tire provides a self-cleaning tread design with enhanced traction on tough slopes. The range of sizes and ply ratings offered in the Carlisle Trac Chief® skid steer line has also been expanded. Look for the NEW designations throughout the catalog to locate additional products to enhance your business.

This edition of the Carlisle Specialty Tire Catalog affords easy access to the latest product information, technical specifications, tread designs and applications. Use these color guides to easily find the product that serves your specialty application.

For additional information, please visit www.carlisletire.com or contact your Carlisle Representative.

We appreciate your business and look forward to growing together.

CTP Transportation Products is a proud member of the Outdoor Power Equipment Aftermarket Association (OPEAA), the Outdoor Power Equipment Institute (OPEI), the National Association of Trailer Manufacturers (NATM), the Specialty Equipment Market Association (SEMA), the Tire and Rim Association (TRA) and the Rubber Manufacturers Association (RMA).

Table of Contents

Lawn, Garden and Golf- Outdoor Power Equipment 4

TURF SAVER® - Market leading classic, popular for residential mowing applications.	6
TURF SAVER II - Second generation Turf Saver® II with round shoulder design. A value tire for residential applications.	7
TURF TRAC R/S - Very versatile turf tire with balanced profile for pro, consumer and other applications.	7
TURF SMART® - Carlisle's newest innovation for the pro turf maintenance market with self-cleaning tread.	8
TURF MASTER®/MULTI TRAC C/S - Commercial grade performance with a profile to optimize stability and traction.	9-10
ULTRA TRAC - Ultra high flotation tires. Popular for large grounds maintenance equipment applications.	10
FAST TRAX - Unique low profile tire. Aggressive tread and great traction.	11
TURF CTR - Tread lightly with this low impact, round shouldered design.	11
SMOOTH - Turf-friendly smooth profile for pro mowers and grounds maintenance equipment.	12
STRAIGHT RIB - Another top turf care design. Great for ZTR, golf and other applications.	12
WHEELBARROW - Classic Wheelbarrow Rib for lawn carts, spreaders and wheelbarrows.	13
TOUR MAX™ Upscale choice for golf cars and closed-community vehicles.	14
TURF GLIDE - A traditional course classic featuring shock absorbing sidewalls and round shoulder profile.	14
LINKS - Premium level golf tire product with unmatched stability, durability and puncture resistance.	14
LINKSPORT® -Advanced golf tire with progressive matrix tread. Stability, traction and durability.	14
FAIRWAY PRO - A workhorse value delivering maximum golf course service.	15
STUD - Versatile stud tread suitable for a variety of rugged applications.	15
SAWTOOTH - The Carlisle Sawtooth is a functional tread design popular for material handling equipment.	15
SUPER LUG/POWER TRAC/TRU POWER - Aggressive traction tire often used for tiller and garden tractor applications.	16
AT101 CHEVRON - Special lug with bar design for ZTR drive tires and other applications.	16
SNOW HOG - Snow thrower design, with added traction.	17
XTRAC - Aggressive tread for snow thrower and other push-behind applications.	18
INDUSTRIAL TRAX - Versatile tire designed for hard surface utility vehicle applications.	18

ATV/UTV - Powersports 20

A-C-T - Radial All-Conditions-Tire. Deep self-cleaning open tread.	22
A-C-T HD - Heavy duty All-Conditions-Tire with increased puncture resistance and pressure (PSI) capabilities.	23
AT489 - Powersports Industry favorite. The 489 is light, strong and stable.	24
AT489 X/L - Lightweight, 6-ply rated 489 for exceptional intermediate to hard surface use.	25
AT 489 II - Powersports Industry favorite. The 489 is light, strong and stable.	25
BADLANDS A/R - Original equipment specs. Smooth-riding radial technology.	26
BADLANDS XTR - Beefed up Badlands radial construction with enhanced handling and traction.	26
BLACK ROCK - Versatile conditions tire, but definitely mud trail terrain focused.	27
HD FIELD TRAX - All around Git-R-Done field, farm and general outdoor favorite.	28
KNOBBY - Classic knobby tread design yielding both puncture resistance and traction.	28
MUD WOLF® - Carlisle's trail-capable mudslinger.	29
MUD WOLF® XL - Mud performer offered in additional sizes.	29
STRYKER - Techno-military look with chevron design. All purpose, work ready and self-cleaning.	30
TRAIL WOLF® - Recreational intermediate to hard surface forward traction design with extended wear compound.	31
TRAIL WOLF® SPORT - Recreational rider offering specific front/rear tread designs.	32
TURF TAMER - From competitive track to recreation, the Turf Tamer is a longtime favorite.	33
ALL TRAIL® - Excellent for utility and worksite applications.	34
ALL TRAIL® II - An extension of the All Trail line. Workhorse applications.	34
TERRATHON - Versatile all-terrain tire. Excellent for OE replacement.	35
ATV/UTV WHEELS - Brunt Series 105 – Steel Wheels	36

Trailers, Toy Haulers, & Towables 38

SPORT TRAIL LH - Perfect for boat trailers, cargo trailers, horse & stock trailers, utility trailers & specialty trailers	40
ULTRA SPORT RADIAL RH - Performance look radial trailer tire	40
RADIAL TRAIL RH - Carlisle's best performing radial trailer tire.	41
USA TRAIL - Complete line of bias products for applications requiring durable performance.	42
SPORT TRAIL - Sport Trail bias construction with a radial look.	43

Ag/Construction 44

FARM SPECIALIST® F-2 TRIPLE RIB - Triple rib front for improved steering in loose soil.	46
FARM SPECIALIST® F-2M QUAD RIB - Quad rib front design. Flotation and variable soil steering.	46
FARM SPECIALIST® F-3 - Industrial front for industrial service application.	47
FARM SPECIALIST® FARM IMPLEMENT F-I - Highway Service Implements.	47
FARM SPECIALIST® HF-1 - Wide flotation Implement tire for balers, wagons and harvest equipment.	48
FARM SPECIALIST® I-1 - Implement tire for wagons, tankers, seeders, balers and other flotation applications.	48-49
TRAC CHIEF® I-3 - Outstanding choice for backhoe applications. Traction implement design.	49
FARM SPECIALIST® R-1 - Multi-angle long bar tread for general farming applications.	50
FARM SPECIALIST® R-1-HA - High-angle straight bar tread for classic appearance.	50
TURF PRO R-3 - Flotation tread design for general turf and mowing applications.	51
MULTI TRAC CS R-3 - For general turf and mowing applications for minimal ground disturbance.	51
XTRA GRIP R-4 - Heavy duty design for backhoe and industrial applications.	51
WT300 - New turf-friendly compact skid steer tractor design for landscaping and other light duty applications.	51
TRAC CHIEF® - Standard duty Skid steer and tractor traction applications.	52
TRAC CHIEF® XT - Standard duty full traction skid steer designs in extra load ratings.	52
GUARD DOG® HD - HD Premium level performance for skid steer and backhoe applications.	53
ULTRA GUARD® - Severe service skid steer with, open shoulder tread design.	53
ULTRA GUARD® LVT - Extreme service skid steer tire with low void tread area.	53
USA LOADER® - Aerial platform lifts, backhoes, and skid steer tractor applications.	54

Industrial 56

INDUSTRIAL DEEP TRACTION - Standard service application for forklifts.	58
ROAD ROLLER - Heat resistant design for paving equipment.	58
INDUSTRIAL ALL PURPOSE - Multi-purpose tire for industrial equipment.	58
PREMIUM WIDE TRAC - Forklift and material handling applications - premium levels	59
GROUND FORCE ULTRA RIB GSE - Deep tread design with premium compounding for ground support equipment.	60

TURF SAVER

TURF SAVER® *Extra-wide, extra-care to prevent turf damage*

With its classic square shouldered design, Carlisle Turf Saver is the market leader for residential riding lawn mowers worldwide. The flat profile and chevron tread provide excellent traction. Turf friendly design and breadth of line make it versatile in both application and fitment.

TURF SAVER II

TURF TRAC R/S

TURF SAVER II

The Turf Saver II is a modified version of the Turf Saver. It features a round shoulder profile and is designed for use on residential riding lawn mowers. It is also commonly used for towable lawn carts, spreaders, sprayers and other mower attachments.

Size	Product Code	Ply	Mounted Diameter	Mounted Width	Rim Width	Max Load Capacity @ 10 MPH	Max PSI	Tire Weight
13 x 5.00 - 6	5112201	2	12.5	4.5	3.50	290	20	3.3
15 x 6.00 - 6	5112301	2	14.3	5.9	4.50	365	14	4.3
16 x 6.50 - 8	5112951	2	16.1	6.2	5.38	410	14	5.3
18 x 8.50 - 8	5112701	2	17.6	8.2	7.00	520	10	7.4
18 x 9.50 - 8	511284	2	17.8	9.1	7.00	695	12	6.7
20 x 8.00 - 8	5112801	2	19.1	8.9	7.00	600	10	8.8

All Lawn, Garden and Golf are Non-Highway Service (NHS) Tires.

TURF TRAC R/S

Carlisle's Turf Trac R/S offers all-around performance with a balanced profile and ample tread depth. Applications range from residential zero turn mowers to utility vehicles. The variety of sizes available corresponds to the many possible uses.

Size	Product Code	Ply	Mounted Diameter	Mounted Width	Rim Width	Max Load Capacity @ 10 MPH	Max PSI	Tire Weight

NEW

TURF SMART®

The Carlisle Turf Smart provides supreme traction, turf protection and durability for all of your grounds care needs. Traction is enhanced through an innovative tread design featuring a self-cleaning Groove Ejection System which helps to keep the tread pattern fully engaged with the turf. This provides consistent performance required by grounds care professionals. Used primarily on ZTRs, riding mowers and other grounds care equipment.

ULTRA TRAC

The Carlisle Ultra Trac is the right approach for those specialized applications where high flotation is essential. Ultra Tracs are wide with a flat footprint and reduced void in the tread. These features yield low ground pressure and good traction while preserving the turf. Ultra Trac tires are most often utilized on golf and grounds maintenance equipment.

FAST FACT

Did you know? Squared shoulder tires are designed to achieve a larger, flatter footprint while providing high flotation, enhanced traction and a more rugged appearance.

Consumer, Commercial Turf Equipment, Golf Cars & Utility Vehicles

FAST TRAX

Fast Trax is a moderately aggressive, low profile drive tire with a wide flat profile. The tire is typically used on professional riding mowers where excellent hillside traction is desired.

Size	Product Code	Ply	Mounted Diameter	Mounted Width	Rim Width	Max Load Capacity @ 10 MPH	Max PSI	Tire Weight
18 x11.00-10 NHS	501043	4	17.7	9.7	8.50	1100	22	13.0

All Lawn, Garden and Golf are Non-Highway Service (NHS) Tires.

TURF CTR

Carlisle's Turf CTR is a round shouldered, low impact tire usually seen on professional ZTR mowers when treading lightly is critical.

Size	Product Code	Ply	Mounted Diameter	Mounted Width	Rim Width	Max Load Capacity @ 10 MPH	Max PSI	Tire Weight
22 x 11.00 - 8	511501	4	22.4	10.8	9.00	935	10	14.5

All Lawn, Garden and Golf are Non-Highway Service (NHS) Tires.

FAST FACTS:

Did you know? The load carrying capacity of a tire is determined by air pressure and air volume. Tire construction determines the constraints on the air pressure and air volume.

4.80 - 8	5130511	4	16.5	4.6	3.75	765	70	4.1

All Lawn, Garden and Golf are Non-Highway Service (NHS) Tires.

FAST FACTS:

Did you know? Wheelbarrows were used more than 2000 years ago as a simple yet effective way for one person to carry heavy loads and to unload goods quickly. The average wheelbarrow today holds 6 cubic feet of material. To keep a wheelbarrow safe and easy to use, balance the load evenly and maintain tire inflation.

In selecting upgrade or replacement ATV tires, begin by identifying the type of riding and terrain surface. The correct tire choice dramatically affects ride satisfaction, performance and handling characteristics. Application-specific tires make remarkable gains in vehicle performance if used in intended environments. When selecting ATV tires, performance features such as flotation, flexibility, cornering capability, ply-rating and puncture resistance are factors that should be considered.

ALL-PURPOSE TIRES. Carlisle All-Terrain, OEM replacement or Trail-Rated tires offer traction in a wide range of conditions and are not designed to excel in one particular terrain. For stones, hard pack, mud, and various other conditions, an all-purpose tire is recommended. The Carlisle AT489 is an industry leader, excelling in all-terrain applications.

MUD TIRES. Terrain-specific Mud Tires are specially designed to gain traction in difficult wet and sticky conditions with large tread bar systems that offer rotation-based, self cleaning features. Goo-rated tires are characterized by sharp angled tread. Mud tires are not recommended for dry conditions.

SAND TIRES. Sand-specific tires feature paddle styled tread features for loose terrain displacement. Enthusiasts often use smooth or slick style front tires for sand dune performance. Not recommended for other applications.

SPORT PERFORMANCE TIRES. For aggressive trail riding delivering consistent traction on medium to hard packed terrain, a sport performance tread choice is recommended.

FAST FACTS:

Did you know? Specialty tires are subjected to the most diverse range of use environments, load requirements, sidewall hazards, storage conditions and wet and dry surfaces in the tire industry. Carlisle R&D develops rubbers, chemical additives and other advanced material compounds to create safer and longer-lasting tires for the intended environment. In addition, tread patterns are purpose-designed for agricultural, all-terrain, construction, industrial, lawn, garden, and road surface environments.

TRAIL WOLF®

Deep, wrap-around tread design promotes forward traction while minimizing lateral slip. Stiff sidewalls increase cornering control. Compound formulated for longer wear and increased replacement intervals. Extended wear product. Popular sport and youth quad sizes also available. Designed with rim-guard to protect wheel lip.

ALL TRAIL® / ALL TRAIL® II

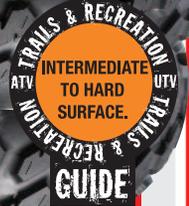

The All Trail® and All Trail II lines are specifically designed for use on hard surface conditions. The low, wide profile and sturdy 4-ply rated carcass reduces soft, wallowing chassis roll commonly experienced with other tires. A unique, tight tread pattern offers a smooth ride experience. The specially-formulated compound delivers durable, extended tire life with responsive, predictable and level handling on pavement, concrete and hard-packed soil. Made in USA.

NEW. Carlisle Radial Trail^{RH} Radial Trailer Tire. For Toy Haulers, Boat Trailers, Cargo Trailers, Utility Trailers, Stock Trailers and other towable applications. The new and improved second generation Radial Trail^{RH} combines two new Carlisle technologies. Utilizing **DuraTrail[™]** technology, a high strength belt package with micro-fiber reinforcement and fully optimized ply construction, the RH Series offers improved load-carry capacity and lateral stability, reducing trailer sway. **HeatShield[™]** Technology combines specially blended heat resistant polymers producing a tread compound superior heat aging endurance. Fourteen popular sizes are offered in the RH Series with custom steel belt configurations designed for the tread profile of each size and load range combination. See Page 41.

NEW

SPORT TRAIL LH

The Sport Trail LH brings an optimized tread pattern for larger bias trailer tires (>12" rim diameter). The tread and contour were designed to increase endurance, reduce heat build-up and maintain even wear for extended tread life.

RADIAL TRAIL RH

Radial Construction and variable pitch design reduces road noise and excessive heat buildup, increasing tire life. Tire profile and tread formulation creates lower rolling resistance thus increasing fuel mileage. Substantially exceeds D.O.T. requirements. The Radial Trail RH is equipped with DuraTrail™ and HeatShield™ Technology.

DuraTrail™ Technology

Increases the integrity of the tires performance in challenging environments by incorporating ultra high strength steel belts with micro-fiber reinforcements.

Heat Shield™ Technology

Ensures longer tire performance with the introduction of engineered compound of specially blended heat resistant polymers.

FAST FACTS:

Did you know? Steel wires in radial tires become magnetic with use and as they rotate a significant alternating magnetic field is created, measurable close to the wheel well when the vehicle is moving.

Trailers, Toy Haulers & Towables

Trailer-Bias

Boat Trailers, Cargo Trailers, Horse & Stock Trailers, RV- Towable Utility Trailers, & Specialty Trailers

USA TRAIL®

Tread compound and tire profile allows for more uniform wear. Tread design improves puncture resistance. Substantially exceeds D.O.T. requirements. Made in the USA.

Carlisle agricultural and construction tires are workhorses of American farm and industry. Applications for farm fronts and rears, implement, skid steer, backhoes, industrial and more.

NEW PRODUCT ADVISORY:

Carlisle's newest skid steer loader tire, the new Ultra Guard LVT, combines longer wear and better performance for less downtime and in turn more profitability for contractors. The Ultra Guard LVT is purpose-designed for hard surface application, featuring a tread pattern which maximizes both surface contact and the working life of the tire. Maximum ground contact is achieved through use of the Ultra Guard LVT's high lug-to-void tread pattern. Carlisle used a premium chip/chunk resistant tread compound which prolongs tire life and delivers increased puncture resistance. The LVT features an innovative center bar at the crown of the tire which further extends tread life.

FAST FACTS:

Did you know? The first four-wheel skid-steer was developed in the 1960s. Skid steers have 4 wheels that are locked in synchronization on each side. The left and right side wheels can be driven independently. When turning the left or right wheels, the machine turns by skidding the other wheels across the surface allowing for a zero-turn radius.

Flap is included for these tube type (TT) tires.

Unless otherwise noted, load limits listed are for the Load Wheel on Counterbalanced Lift Trucks. Tire load limits will be lower if used on continuous service Industrial Vehicles.

FORKLIFT/MATERIAL HANDLING:

Premium Wide Trac, Industrial Deep Traction

Heavy ply construction and increased gauge deliver optimum tire life, while stabilizing features such as a larger tread volume and a wide, flat profile insure each of our forklift tires will deliver excellent performance.

Industrial

Industrial Airport Support Equipment

GROUND FORCE ULTRA RIB GSE®

Sturdy Rib tread pattern specially designed for optimal performance on ground support equipment.

Size	Product Code	Ply Rating	Mounted Diameter	Mounted Width	Rim Width	Max Load Capacity @10 MPH	Max PSI	Tire Weight	Tread Depth (32nds)
4.80 - 8 NHS (TT)	60133	8	16.5	4.8	3.8	1160	145	10.7	11
5.70 - 8 NHS (TT)	60132	8	18.4	5.9	3.8	1470	120	12.8	11

Black Rock Series 910B Intruder Toy Hauler Wheel

- Name: Series 910B Intruder
- Construction: 1-Piece Aluminum
- Finish: Matte Black
- Offset: RWD
- Lug Nut Type: Conical Seat, Not Included, Order Separately
- Cap Not Included
- Engineered and Tested for Trailer Use
- S.A.E. J1204 Compliant
- Torq Lock™ Mounting System
- Steel Lug Inserts

Carlisle Tubes

Tires in certain agricultural, industrial and other application segments are designed for use with tubes. Correct use of tire tubes can prevent air leakage, sustain long term use, reduce rolling resistance, support heavy loads, preserve tread life, and offer resistance to age and heat-related failure. Carlisle tubes have been designed for best air retention properties, high dimensional stability during service and reduced equipment downtime.

Limited Warranty

Highway / Non-Highway Tire Warranty

SPECIALTY TIRE WARRANTY

CTP Transportation Products ["CTP"] warrants, subject to the terms, conditions and limitations stated herein, CTP's tires and wheels to be free from defects in materials and workmanship.

CTP's liability for tires and wheels shall be limited to replacement of any defective tire or wheel plus any applicable taxes.

1. **THE CTP Transportation Products WARRANTY ["Warranty"]** applies only to the Original Purchaser of the CTP tires and/or wheels for TWO YEARS from the date of purchase.
 - (a) The Warranty for the coating of the wheel is for a period of ninety (90) days from the date of purchase.
2. The Warranty is void if the tire or wheel fails due to damage from improper inflation pressures, exceeding the maximum speed limit, or overloading the tire beyond the maximum load capacity stated on the sidewall.
3. The Warranty does not cover incidental or consequential damages, including, but not limited to, lost time, inconvenience, loss of vehicle use, cost of towing or transportation, related property damage or consequential damages of any type or nature.
4. The Warranty does not cover mounting and balancing charges.
5. The Warranty is void if a covered tire is worn past last 3/32 of tread depth at any point on the tread contact surface.
6. The Warranty **DOES NOT** apply to the following:
 - (a). continued use while run flat or under a state of acute under-inflation
 - (b). tire damage or irregular wear due to road hazard, including puncture, cut, impact break, bulge, snag, stone drill, or collision
 - (c). repaired tubes, tires or wheels
 - (d). tires or wheels used in racing or competition
 - (e). tires or wheels subjected to overloading, improper mounting, use of an incorrect rim, purposeful abuse or chemical contamination
 - (f). tires or wheels which have been patched, plugged or repaired or into which liquid balancers or sealants have been introduced
 - (g). cosmetic irregularities
7. CTP makes no expressed claims of expected tire wear. Variables that affect tire wear are driving conditions, load and tire inflation pressure.

To obtain warranty adjustments or warranty information contact your CTP dealer or call CTP's Customer Care Unit at 1-800-260-7959 or fax to 1-800-352-0075. Claims must be made within 30 days of discovery of irregularity. CTP reserves the right to inspect all products before making adjustments.

THERE ARE NO WARRANTIES EITHER EXPRESSED OR IMPLIED, INCLUDING THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WHICH EXTEND BEYOND THE DESCRIPTION ON THE FACE HEREOF. CTP SHALL NOT BE LIABLE FOR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGES. NO REPRESENTATIVE OF CTP HAS AUTHORITY TO MAKE ANY REPRESENTATIONS OR PROMISES EXCEPT AS STATED HEREIN.

Some states do not permit limitations on the period of an implied warranty and do not permit the exclusion or limitation of incidental or consequential damages, therefore the above limitations or exclusions may not apply. This warranty provides specific legal rights. Other rights may vary according to the state/province in which the original purchaser is located.

NOTE: All Specifications subject to change without notice Rev. 11/09

Highway / Non-Highway Tube Warranty

TUBE WARRANTY

CTP Transportation Products ["CTP"] warrants, subject to the terms, conditions and limitations stated herein, its Highway/Non-Highway Tubes (tubes) to be free from defects in materials and workmanship.

1. **THE CTP WARRANTY ["Warranty"]** applies only to the original purchaser of the tubes and only if they are used in the service for which they are intended. Rear tractor tubes are warranted for a period of five (5) years from date of manufacture. All other tubes are warranted for a period of three (3) years from date of manufacture. A covered tube will be warranted in the following manner:
 - (a) replace tube
 - (b) refund cost of tube (proof of purchase required)
2. The Warranty is void if the tube fails due to damage from improper inflation pressures, exceeding or overloading the tube/tire beyond the maximum load capacity stated on the sidewall.
3. The Warranty does not cover incidental or consequential damages, including, but not limited to, lost time, inconvenience, loss of vehicle use, cost of towing or transportation, related property damage or consequential damages of any type or nature.
4. The Warranty does not cover mounting and balancing charges.
5. The Warranty **DOES NOT** apply to the following:
 - (a) repaired tubes
 - (b) tubes used in racing or competition
 - (c) tubes subjected to road hazards (punctures, cuts, stubble damage, impact, valve pulled from tube, etc.), overloading, under-inflation, mounting damage, fitment to incorrect rim, purposeful abuse or chemical contamination
 - (d) tubes into which liquid balancers or sealants have been introduced
 - (e) cosmetic irregularities
 - (f) weather checking caused by improper storage

To obtain warranty adjustments or warranty information contact your CTP dealer or call CTP's Product Service Department at 1-800-260-7959 or fax to 1-800-352-0075. Claims must be made within 30 days of discovery of defect. CTP reserves the right to inspect all products before making adjustments. THERE ARE NO WARRANTIES EITHER EXPRESSED OR IMPLIED, INCLUDING THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WHICH EXTEND BEYOND THE DESCRIPTION ON THE FACE HEREOF. CTP SHALL NOT BE LIABLE FOR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGES. NO REPRESENTATIVE OF CTP HAS AUTHORITY TO MAKE ANY REPRESENTATIONS OR PROMISES EXCEPT AS STATED HEREIN.

Some states do not permit limitations on the period of an implied warranty lasts and do not permit the exclusion or limitation of incidental or consequential damages, therefore, the above limitations or exclusions may not apply. This warranty provides specific legal rights. Other rights may vary from state/province to state/province.

NOTE: All specifications subject to change without notice.

Agricultural Tire Warranty

Workmanship & Materials Warranty

WARRANTY

CTP Transportation Products, LLC (“CTP”) [“Warranty”] warrants, subject to the terms, conditions and limitations stated herein, tires to be free from defects in materials and workmanship.

CTP’s liability for tires and wheels shall be limited to replacement of any defective tire or wheel plus applicable taxes.

- This warranty applies to the original consumer of the CTP product(s) for a period of five (5) years from the date of purchase or from the date of tire manufacture. (Proof of purchase must be provided by consumer if using date of purchase as basis for service time.)
- This warranty **DOES NOT** cover incidental or consequential damages, including, but not limited to, lost time, lost wages, inconvenience, loss of equipment use, cost of service work or transportation, related property damage, personal injury or consequential damages of any type or nature.
- What is warranted?** This warranty applies to CTP Front Farm, Implement, and Rear Tractor Tires, purchased after 06/30/08. (Skid Steer Tires are covered under our Specialty Tire Warranty). If any tire becomes unserviceable due to defective workmanship or materials, (conditions which may be within CTP’s control), CTP will replace the defective product with an equivalent new CTP Tire on a pro rata basis.
- This warranty is void if a covered tire is worn past 3/32” of tread depth at any point on the tread contact surface.
- Any tires submitted for ride condition, issues must be presented by the consumer within the first six (6) months of service if accompanied by Proof of Purchase.
- This warranty **DOES NOT** cover mounting, balancing, or related service/labor charges.
- This warranty **DOES NOT** apply to the following:
 - FIELD HAZARD OR STUBBLE DAMAGE (cuts, snags, punctures, chunk in tread or shoulder area, penetration from foreign objects and stubble related tire damage).
 - Overloading, improper inflation pressure, and/or resulting run flat failures.
 - Misapplication of tire or wheel components.
 - Improper repair or insertion of balancing materials or sealant.
 - Tires damaged due to chemical contamination.
 - Improper mounting or tire storage conditions.
 - Tires used in pulling contests.
 - Cosmetic irregularities or tires marked “NA” (Non-Adjustable)
 - Skid Steer Tires (See Specialty Tire Warranty)

8. Warranty Pro Rata Calculations

All calculations will be based on the date of tire manufacture or the date of purchase. If using date of purchase as basis for service time, the consumer must supply the original proof of purchase.

After the “No Charge” period, pro rata replacement tire charges are calculated as follows:

Workmanship and Materials Coverage

Service Time	Replacement Tire Charge to Consumer
Up to 1 Year	No Charge
During 2nd Year	20% Charge
During 3rd Year	35% Charge
During 4th Year	50% Charge
During 5th Year	70% Charge

To determine the replacement price to the consumer, the pro rata percentage charge is multiplied by the CTP Tire dealer’s current selling price on an equivalent CTP Tire. Appropriate taxes, mounting, or other service charges will be added to the replacement price, which is the responsibility of the consumer.

- CTP makes no express claims of expected tire wear. Variables that effect tire wear include service and soil conditions, as well as load and tire inflation pressures.

To obtain warranty adjustments or warranty information contact your CTP dealer or call CTP’s Customer Care Unit at 1.800.260.7959 in the USA or 1.800.265.6155 in Canada. Claims must be made within thirty (30) days of discovery of defect.

CTP reserves the right to inspect all products before making adjustments.

Field Hazard & Stubble Damage Warranty

Although Agricultural Field Hazards and Stubble Damage are **NOT** the result of defects in workmanship and materials, CTP has elected to share the burden with the original purchaser when excessive Stubble Damage or Field Hazards render a tire unusable.

- Field Hazard- is defined as cuts, snags and punctures incurred during normal agricultural service that may render a tire unserviceable.
- Stubble Damage- is defined as the tire damage caused by severe abrasions and scarring, due to field debris, crop residue, and field stubble, which eventually render the tire unusable

What is warranted? CTP will extend a Field Hazard and Stubble Damage Policy for CTP brand R-1, R-2 and R-3 agricultural tires used in normal agricultural service for three (3) years from the date of the purchase or date of the manufacture. (Proof of purchase must be provided by the consumer if using date of purchase as basis for service time.)

- What IS NOT** covered by this Field Hazard/Stubble Damage Policy:
 - Improper mounting or tire storage conditions.
 - Misapplication of tire or wheel components.
 - Overloading, improper inflation pressure, and/or resulting run flat failures.
 - Accident, collision, fire or vandalism.
 - Improper repair or insertion of balancing materials or sealant
 - Tires damaged due to chemical contamination.
 - Tires used in pulling contests.
 - Cosmetic irregularities or tires marked “NA” (Non-Adjustable)
- This warranty **DOES NOT** cover incidental or consequential damages, including, but not limited to, lost time, lost wages, inconvenience, loss of equipment use, cost of service work or transportation, related property damage, personal injury or consequential damages of any type or nature.
- Warranty Pro Rata Calculations for Field Hazard/Stubble Damage Coverage
All calculations will be based on the date of tire manufacture or the consumer’s date of consumer’s purchase. If using date of purchase, the consumer must provide the original proof of purchase.

Pro rata replacement charges are calculated as follows:

Field Hazard and Stubble Coverage

Service Time	Replacement Tire Charge to Consumer
Up to 1 Year	25% Charge
During 2nd Year	50% Charge
During 3rd Year	75% Charge
End of 3rd Year	Coverage Expires

To determine the replacement price to the consumer, the pro rata percentage charge is multiplied by the CTP dealer’s current selling price on an equivalent CTP tire. Appropriate taxes, mounting, or other service charges will be added to the replacement price which is the responsibility of the consumer.

- CTP makes no express claims of expected tire wear. Variables that effect tire wear include service and soil conditions, as well as load and tire inflation pressures.

To obtain warranty adjustments or warranty information contact your CTP dealer or call CTP’s Customer Care Unit at 1.800.260.7959 in the USA or 1.800.265.6155 in Canada. Claims must be made within thirty (30) days of discovery of defect.

CTP reserves the right to inspect all products before making adjustments.

THERE ARE NO REPRESENTATIONS OR WARRANTIES EITHER EXPRESS OR IMPLIED, INCLUDING THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WHICH EXTEND BEYOND THE DESCRIPTION OF THE WARRANTY STATED ABOVE. CTP SHALL NOT BE LIABLE FOR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGES. NO REPRESENTATIVE OF CTP HAS AUTHORITY TO MAKE ANY REPRESENTATIONS OR PROMISES EXCEPT AS STATED HEREIN.

Aftermarket Styled Wheel Warranty Workmanship & Materials Warranty

CARLISLE WHEEL LIMITED WARRANTY

Steel Wheels. CTP warrants, subject to the terms, conditions and limitations stated herein, wheels to be free from defects in materials and workmanship. Wheels are warranted to be free from structural failure for as long as the original purchaser owns the product. CTP's liability for wheels shall be limited to replacement of any defective wheel plus applicable taxes, if any. The Warranty period for steel wheel coatings, including paint, chrome plating, clear coat or other coating, is ninety (90) days from date of purchase. Surface rust can be prevented by proper care and is not covered by this warranty.

Aluminum Wheels. CTP warrants aluminum alloy wheels to be free from defects in material and workmanship under normal and intended use for a period of one (1) year from retail purchase. Wheels are warranted to be free from structural failure for as long as the original purchaser owns the product.

This Warranty is in lieu of all other express and implied warranties, including warranties of merchantability and fitness for a particular purpose. CTP agrees to repair or replace, at the sole discretion of CTP, wheels that are returned for warranty inspection to 2233 E. Philadelphia St., Ontario, California 91761 (freight pre-paid), and which, after examination show that said product has failed in normal use and service due to material and/or workmanship. Call Warranty Dept. at 909.947.1831 for additional information.

CTP, by the sale of products to Distributors and Dealers engaged in the sale of automotive parts and accessories, makes no express or implied warranty or representation as to the quality of workmanship of said distributors and dealers or the ability of any individual connected therewith to render technical advice or assistance in connection with installation or use of CTP wheels. No distributor, dealer or other entity or individual is authorized to modify or amend this Warranty in any respect.

This warranty is void if:

- A. The product has been subject to misuse, damage in transit, accident, negligence, abuse, racing, off-road use, aftermarket modification, or has been repaired or altered in any way.
- B. The product(s) have not been installed according to instructions provided with the wheels or in accordance with tire and wheel industry standards.
- C. Wheels are installed with accessories other than CTP accessories.
- D. The original sales documents are not provided for verification.
- E. The wheel(s) are not fit-checked before mounting.

CTP assumes no responsibility for diagnosis, removal and installation labor, loss of vehicle use, loss of time, inconvenience, or other consequential expense.

CTP reserves the right to make changes in design, materials or specifications, or to make product changes without prior notice or obligation to incorporate same into purchased items. This Limited Warranty gives you specific legal rights and you may also have other rights which vary from state-to-state.

Notice:

Prices and product specifications included herein are subject to change without notice. Product availability is subject to inventory. All product images, photographs and representations herein are based upon product information available at time of printing. Some products may vary in appearance. See products for actual product depiction and configuration. CTP Transportation Products, LLC ("CTP") reserves the right to change, limit or discontinue at any time, without prior notice, products, product prices, finishes, materials, applications and other specifications, including Warranty provisions.

Trailer Tires: Tips & Best Practices

From a highway blowout to a construction trailer flat on the work site, trailer tire failure is an inconvenience that can be avoided. Use the correct tires, calculate the correct load and maintain the right inflation to avoid problems.

Use the Right Tire

Trailer tire requirements differ greatly from automotive or light truck tires. Trailer tires are designated "ST" for Special Trailer tires. Automotive tires are designated "P" for Passenger or "LT" for Light Truck and are not designed for trailer use. Passenger or truck tires, with their more flexible sidewalls, can result in trailer sway problems. The stiffer, heavy duty sidewalls of ST tires are designed to control and reduce sway problems. Trailer sway is dangerous at higher speeds, with top heavy loads or on vehicles with inadequate tongue weight.

- Trailer tires are designed for use on trailer axle positions only.
- Do not use Passenger (P) or Light Truck, (LT) Automotive tires on trailers.
- Do not use Trailer tires (ST) on passenger cars or light trucks.
- An "LT" designation, when shown on a trailer tire size specifies load range only. It is not designed for use on light trucks.

The ST Difference

The construction, design, materials and testing used in ST Special Trailer tires meet the higher load requirements, duty cycles and special demands of trailering.

- Polyester cords in an ST tire are bigger than in a comparable P or LT tire.
- Steel cords used in ST tires have a larger diameter and greater tensile strength to meet additional load requirements.
- ST tire rubber compounds contain chemicals to resist weather and ozone cracking, particularly conditions resulting from extended storage and the unusual duty cycles of trailer tires.
- The slightly shallower tread depth of a trailer tire reduces sway and rides cooler, which adds to tire longevity.
- ST tires feature stiffer sidewalls, especially in the lower section which:
 - Reduces sidewall flexing causing the trailer to track straighter.
 - Diminishes the risk of trailer sway.
 - Lessens the risk of sidewall puncture and blowout.
- ST tires generally offer approximately 10% percent more load capacity than a similar LT tire and nearly 40% more than a P passenger tire.

Bias vs. Radial

Some ST trailer tires are bias-ply tires, which have crisscrossing cords of polyester and/or nylon. Trailer tires are also offered in radial construction. Radial trailer tires feature plies that run perpendicularly across the tire, with belts (some made of steel) running under the tread.

- Bias-ply trailer tires are recommended for tough, rugged performance and sidewall puncture resistance such as trailers used for construction, agriculture and some marine applications.
- Radial tires are recommended when smooth ride, tread wear, heat and extended tire life are important considerations. Depending upon the trailer duty cycle (storage time vs. actual time in use under load) the mileage expectation of a radial trailer tire can be from 5,000 to 12,000 miles. However, under well maintained conditions, proper inflation and correct loads, considerably higher miles have been reported.

Load Limits

Trailers are used for one purpose, transporting loads. A major cause of trailer tire failure is overloading. It's important to know the weight of the actual load of the payload under tow, including all the toys, equipment, gas, gear, water and the trailer itself. An over-loaded tire will produce excessive heat in the sidewall and tread which can quickly cause tire degradation or blowout. Excessive heat is the number one cause of trailer tire failure. The problem increases in sunbelt areas where roadway surface temperatures are well above normal conditions.

All tires are manufactured to handle specific load limits, but in towing trailers, loads are the single greatest concern. Review the tire sidewall information and the vehicle owner's manual for vehicle load limits and proper tire inflation. Never exceed the maximum load rating stamped on the tire sidewall or the maximum vehicle load rating, whichever is less. If possible, try to distribute the load evenly across all tires so that no single tire is overloaded. Tongue weight, tongue height and especially load leveling hitches must be set properly to avoid overloading the trailer tires.

ST tires are branded with a load range (LRB, LRC, LRD, LRE and LRF) on the sidewall, listing load range letters in the sidewall description. For example, ST205/75R15LRD.

Discuss specific trailer uses to select the ST tire that is load rated for the situation.

- All tires must be identical in size for the tires to properly manage the weight of the trailer.
- The combined capacity of the tires must equal or exceed the Gross Vehicle Weight (GVW) of the axle.
- The combined capacity of all of the tires should exceed the loaded trailer weight by 20 percent.
- If a tire fails on a tandem axle trailer, replace both tires on that side.
- If the tires are replaced with tires of a larger diameter, the tongue height may need to be adjusted to maintain proper weight distribution.

Inflation

Underinflation is the number one cause of trailer tire failure. Low inflation pressure elevates tread temperature, especially as speed increases. A tire can lose up to half of its air pressure and not appear

to be flat. Check inflation with a quality tire gauge. Operation of a trailer tire that is 30 percent under-inflated can reduce tire lifespan by approximately 55%. An underinflated tire creates abnormal tire flexing and excessive heat causing the following:

- Tire damage and failure.
- Ride and handling disturbance.
- Reduction of tire life.
- Decreased fuel efficiency by as much as 10 percent.

Driving on tires with too much air is also not recommended. Over-inflated tires are more likely to cut, puncture or fail by sudden impact.

When replacing trailer tires, always use new valve stems.

Replacement of Trailer Tires

Trailer tires can be worn beyond use although they may appear to have adequate tread. This is because trailer tires support a lot of weight, even when not in use. It is actually better for a tire to be rolling down the road than to sit in storage, exposed to static weight and UV exposure. During use, a tire releases compound lubricants that are beneficial to tire life. Using tires also assists in preventing flat spots from developing.

If one tire fails, the remaining tires will be required to suddenly compensate by supporting the increased load. This increase of weight may overload the other tires causing a chain reaction blowout or other internal structural damage. After a blowout, check the other tires for damage and replace all tires on the side of the blowout.

Best Practices

- Any tire, no matter how well constructed, may fail when in use because of punctures, impact damage, improper inflation, overloading, or other conditions resulting from use, misuse or neglect.
- High speed towing in hot conditions degrades tires significantly.
- Best practice: Do not exceed 60 mph while towing a trailer.
- Most ST trailer tires in the industry have a maximum speed rating of 65 mph.
- Load carrying capacity decreases as heat and stress generated by higher speed increases.
- Time and the elements weaken a trailer tire.
- 3 to 5 years is the average life expectancy of a trailer tire, regardless of mileage.
- It is estimated that in approximately three years, roughly one-third of a tire's strength is gone.
- After three years, depending upon storage and conditions of usage, consider replacing trailer tires even if they have tread depth remaining.
- After five years, trailer tires should be replaced in all cases.

Review - Best Practices for Safe Trailer Tire Use

- Select the correct tires to match the application and capacity requirements.
- Never use passenger car or truck tires for trailer use.
- Do not overload trailer tires; maximum loads are listed on the sidewall of the tire.
- Maintain air pressure at the maximum PSI recommended on the tire sidewall.
- Check tire pressure when tires are cold and in the shade.
- Use a cap on valve stems to prevent contamination of the internal rubber valve.
- Always travel with a spare and check the spare air pressure along with the other tires.
- Perform a visual inspection of trailer tires before each trip, inspecting for cuts, bulges, punctures or signs of anything unusual.
- Inspect trailer wheels. If rims are bent or cracked, replacement or repair may be necessary.
- Keep trailer tires in a cool dry place and out of direct sunlight during storage.
- Use tire covers to protect tires from the harsh effects of direct sunlight, moisture and temperature extremes.
- During extended storage, use a thin piece of wood or other surface barrier under tires to extend tire life. For seasonal or extreme long term storage, elevate the trailer on blocks to take the weight off the tires. Reduce the air pressure and cover the tires to protect them from direct sunlight.
- Replace trailer tires every three to five years.
- If you experience a series of successive blowouts, something is wrong with your setup, it is not a tire problem.

When it's replacement time, Carlisle offers a complete line of tires designed for most towing applications. Whether your precious cargo is your new bass boat, construction equipment or a family travel trailer, enjoy long, safe travels using the correct tires, properly inflated and within the designated load capacity.
